(54) IMAGE PROCESSOR

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an image processor which can easily use various image forming devices and whose recognition precision is high.

SOLUTION: Output pattern information to a laser light source 11 from engine I/F 6 is inputted to an image recognition part 8. The image recognition part 8 judges whether an image is paper money or securities based on information and gives the result to an engine control part 7. When it is the image of paper money, the formation of the image is inhibited in the laser light source 11, a toner cartridge 12, a photosensitive body 13 and an intermediate transfer body 14.
